## Open Admission

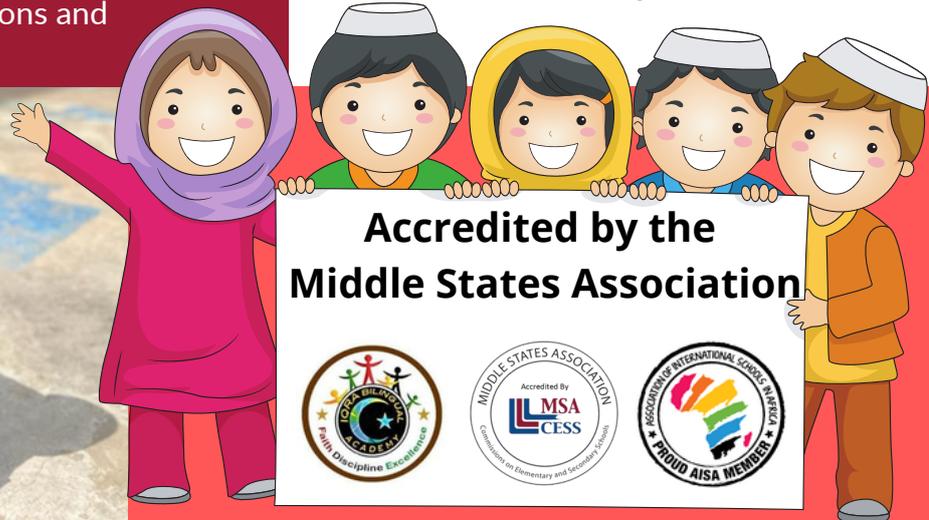

## Curriculum

In Pre-School, your child begins to experiment and structure concrete knowledge. From playful situations guided by the teacher, he becomes increasingly autonomous, learning how to control his language, developing fine motor skills, and learning the basics of visual and sound arts.

The program emphasizes the acquisition of the fundamentals of learning: letters & numbers, numbers and quantity, problem solving, & creative thinking that provides numerous avenues leading toward the goal of literacy. The program increases letter, syllable, and word recognition and solidifies alphabetic knowledge.

Islam is the foundation of everything we do. Students have morning assembly where Islamic lessons are given. Islamic Studies, Quran, and Arabic are offered to help our students grow as Muslims. Daily prayers are a part of our schedule so our students can fulfill their religious obligations and learn the etiquettes of the prayer.

- French Language
- English Language
- Arabic Language
