FAITH DISCIPLINE EXCELLENCE

OVERVIEW

The Elementary School program builds on the foundation of the Early Childhood program. Lessons are coordinated jointly to produce a student who can function proficiently in the next grade and to compare strategies and innovate new ideas. This is a continued evolution that requires care and wisdom to achieve the highest potential for all students. Children are blessings from Allah (God). Our responsibility to them is to instill an awareness and dependence on Allah to live their lives. IQRA Bilingual Academy recognizes the innate and inherent needs of children. Our elementary program strives to fulfill the needs of the child by targeting six basic areas of development: spiritual, psychological, emotional, social, physical, and cognitive development.
